TechNova Solutions
Junior Full Stack Developer Intern

ABOUT THE ROLE
TechNova Solutions is looking for a Junior Full Stack Developer Intern to join our
engineering team. You will work closely with senior engineers to build and maintain
features across our web application, from frontend UI to backend APIs and database
design.

RESPONSIBILITIES
- Build responsive user interfaces using modern JavaScript frameworks.
- Develop and maintain REST APIs for internal and external consumers.
- Work with relational and non-relational databases to store application data.
- Collaborate with the team using Git for version control and code review.
- Participate in an Agile development process with sprint planning and standups.
- Write unit tests to ensure code quality and catch regressions early.

REQUIREMENTS
- Solid understanding of JavaScript and modern ES6+ syntax.
- Hands-on experience with React for building frontend interfaces.
- Experience building backend services with Node.js and Express.
- Familiarity with MongoDB or a SQL database such as PostgreSQL or MySQL.
- Understanding of REST API design principles.
- Comfortable using Git and GitHub for collaborative development.
- Currently pursuing or recently completed a degree in Computer Science or a
  related field.

NICE TO HAVE
- Experience with TypeScript.
- Familiarity with Docker for containerization.
- Exposure to cloud platforms such as AWS.
- Experience with automated testing frameworks like Jest.
- Understanding of CI/CD pipelines.

WHAT WE OFFER
- Mentorship from experienced full stack engineers.

- Real-world project ownership from day one.
- A collaborative, fast-paced startup environment.
